Product Summary

earthborn®

Product Description

For a crisp, classic finish to external masonry, Earthborn Silicate Masonry Paint offers a breathable, high performance alternative to limewash.

Earthborn Silicate Masonry Paint is water-based, virtually VOC free and highly breathable. Its special formulation makes it very hard-wearing, water repellent and can withstand severe extremes of weather.

Use on all mineral-based surfaces e.g. stone, masonry, concrete, pebble dash and plaster surfaces.

Although developed as an external masonry paint, it can be used both inside and outside the home. It is especially suitable for renovation work on historic buildings and for covering old, sound silicate-based paints.

Finish

Dries to a soft matt finish and does not yellow over time.

It comes naturally as white or can also be supplied in a range of colours.
