Product Description

Researched, developed and manufactured in the UK by EcoSolutions, Home Strip Paint and Varnish Remover is a revolutionary unique patented water-based paint stripper. Using science not solvents, it is safer to the user and the environment than other conventional hazardous solvents.

Home Strip® is ideal for use by do-it-yourself enthusiasts, as well as professional users.

Economical to use – goes further than hazardous solvent based strippers

Minimal VOC content (0.000004%, as certified by independent laboratory detection test).

Most DCM-free paint strippers have just replaced one hazardous solvent with another, but Eco Solutions patented technology removes the hazardous solvent content and replaces it with water. It is therefore a safer alternative for you and your family.

Product Features

“Tough not toxic”

Water-based

Non-hazardous

Non-flammable

pH neutral (not caustic)

No fumes

Will not burn the skin

Product requires no ventilation – Suitable for use by people with respiratory problems such as asthma sufferers

No “R” (Risk) or “S” (Safety) phrases.
