Product Description

H3 Insulated Masonry Fixings are plastic fixings to be used internally for anchoring STEICO Therm boards in to solid masonry.

H3 Insulated Masonry Fixings have an integrated plastic washer and sleeve.

Supplied in units of 100 or 200 fixings per box.

Lengths range from 75 mm to 235 mm.

Drill hole diameter = 8 mm.

Washer diameter = 60 mm.

Minimum additional 35 mm is required to embed in to the masonry.

For best results ensure that the drill hole clear of any debris before inserting the fixings.
