### Product Variants

- Mica Flakes ()Colour: Black, Type: FINE 0.15 mm-0.5 mm, Size: 500g
- Mica Flakes ()Colour: Gold, Type: FINE 0.15 mm-0.5 mm, Size: 500g
- Mica Flakes ()Colour: Black, Type: FINE 0.15 mm-0.5 mm, Size: 50g

- Mica Flakes ()Colour: Bronze, Type: FINE 0.15 mm-0.5 mm, Size: 500g
- Mica Flakes ()Colour: Bronze, Type: FINE 0.15 mm-0.5 mm, Size: 50g
- Mica Flakes ()Colour: Gold, Type: COARSE 0.5 mm-2.5 mm, Size: 500g
- Mica Flakes ()Colour: Gold, Type: COARSE 0.5 mm-2.5 mm, Size: 50g
- Mica Flakes ()Colour: Gold, Type: FINE 0.15 mm-0.5 mm, Size: 50g
- Mica Flakes ()Colour: Silver, Type: COARSE 0.5 mm-2.5 mm, Size: 500g
- Mica Flakes ()Colour: Silver, Type: COARSE 0.5 mm-2.5 mm, Size: 50g
- Mica Flakes ()Colour: Silver, Type: FINE 0.15 mm-0.5 mm, Size: 500g
- Mica Flakes ()Colour: Silver, Type: FINE 0.15 mm-0.5 mm, Size: 50g

## Product Description

Metallic and black mica which can add a unique finish to polished plasters and other decorative finishes.

The production process improves the natural effects of the raw Mica material in a range of large flaked or fine powdered products in bronze, silver, gold and black. Mica flakes offer a wide variety of aesthetic effects which become achievable with two different particle sizes and colours. The achieved finishes can be described as granite, flecked, glittering/sparkling or metallic lustre.

All colours and grades are resistant to UV, weather, chemical and thermal degradation and also compatible with a choice of organic and inorganic matrices and systems.

Physical properties include:

Metallic lustre

Controlled colour consistency

Tightly controlled particle size distribution

UV stability

Weather resistance

Solvent resistance

Acid and alkali resistance

Tough but flexible, plate shaped particles

[Use metallic powder pigments and pearlescent lustre to compliment finishes using Mica. Click here for more details.](#)

## Product Attributes

- Colour: Black, Bronze, Gold, Silver
- Type: FINE 0.15 mm-0.5 mm, COARSE 0.5 mm-2.5 mm
- Size: 500g, 50g
