Product Summary

Product Description

Kreidezeit Moroccan Black Soap is made from the olive tree. This traditional soap is used in polishing Tadelakt to give extra a water repellent finish for showers and wet rooms.

Moroccan Black Soap is an olive-oil-based oil restoring soap.

Use Black Soap to give dark coloured Tadelakt surfaces a water repellent and dirt-resistant, shiny finish.

Dilute at a ratio of 1 part of Black Soap to 10 to 20 parts of warm water when using on Tadelakt.

Also use to clean all oiled or waxed surfaces, brushes and rollers.
