- Natural Pigment (500 g) - Natural: Yellow Ochre (K802) ()

Product Description

We supply a wide range of natural, powder pigment suitable for colouring limewash, paints and oils.

Pigment described as 'natural' generally has less colouring power than 'manufactured'. Therefore you will need more pigment to create the desired hue when using natural pigment compared to manufactured pigment.

All of our pigments are lime-stable (alkali resistant) with the exception of Ultramarine Blue. Therefore mix Ultramarine Blue with lime immediately before application to avoid fading.

Sold in 500 gram bags.

Price for larger volumes available on request.
