Product Variants

- Tadelakt Plaster Course ()

Product Description

The Tadelakt Plaster Course teaches participants how to achieve the beautiful, water repellent tadelakt finishes for use in wet rooms and bathrooms.

Our approach is to create a relaxed environment where you will enjoy learning, with ample opportunity for discussion throughout the day and during breaks.

Places on the Tadelakt Plaster Course are limited to 7 people to ensure individual attention to each course participant.

For each session there is a step-by-step demonstration by one of our experienced, specialist plasterers. As a participant, you will have a range of boards and a terracotta pot to practice yourself, with guidance at hand throughout.

A range of colours, finishing soaps, metallic pigments and flakes are available for creating unique tadelakt finishes. You can take your sample boards home at the end of the course. All tools, materials and personal protective equipment for the Tadelakt Plaster Course are provided for on the day.

Our support does not end once you've completed the course. Contact our knowledgeable and helpful Technical Sales Team for troubleshooting and guidance on your individual projects.

We can also supply samples for colour matching schemes to ensure the colour is correct before committing to orders.

You can purchase all materials and tools on the day of Tadelakt Plaster Course to take home with you. You also receive a 10% discount on all future purchases from our range of Moroccan style Tadelakt and associated products.

A 10% discount is available when booking the Tadelakt and Polished Plaster courses

together.

For further information or to book, call our office during opening hours and make a payment by card. You can also make an enquiry online by selecting 'ADD TO QUOTE' and pay us by bank transfer.

As the exclusive UK distributor, Mike Wye and Associates have been involved in the application, supply and guidance using Kreidezeit Tadelakt for many years. Kreidezeit have researched traditional tadelakt formulas, starting from their production in Moroccan lime pits to their application in Moroccan buildings. This has enables them to successfully replicate this beautiful, tactile material. Click here for the Kreidezeit website
