## Product Summary

## Product Description

Thermafleece CosyWool Slabs sheeps wool insulation is a versatile natural insulation made from British wool.

CosyWool Slabs are flexible but denser than CosyWool rolls. Sized to provide extra tight friction fit in walls and roofs providing excellent thermal and acoustic performance.

Research shows that using 75% sheeps wool insulation in combination with recycled fibres outperforms products with a higher percentage of wool. The wool rich blend ensures you get the full benefit of sheeps wool with enhanced performance, durability and sustainability.

Thermafleece CosyWool's convenient compressed form reduces transport impacts by more than 50% compared to other natural insulation. Once unpacked, it regains its original thickness to provide excellent thermal and acoustic performance.

It is long-lasting, safe to handle and contributes to a healthier indoor environment by regulating moisture and absorbing harmful airborne substances in the home. Thermafleece CosyWool is manufactured and supplied in accordance with ISO 9001 quality and ISO 14001 environmental management systems.

**Thermafleece CosyWool sheeps wool insulation incorporates a number of improvements:**

20% more wool compared to existing insulation rolls.

35% less packaging weight per m<sup>2</sup>.

20% more insulation per pack resulting in 20% less transport impacts and 20% less packs to handle and store.

Eden Renewables' Commercial & Technical Director Mark Lynn commented: "At a time when consumers are expecting greater value, it's important we keep innovating to meet this need. With Thermafleece CosyWool we have nearly halved the cost of sheep's wool insulation compared to a decade ago when we first launched the brand".

**Key Facts:**

Width (mm) - 390, 590.

Thickness (mm) - 50, 75, 100, 140, 150.

Thermal Conductivity - 0.039 W/mK.

Sound Absorption - NRC 1.05 @ 100 mm.

Sound Reduction - Rw 40dB @ 75 mm.

Highly Breathable.

Made in the UK.

Contains British Wool.

Manufactured to ISO 9001 & 14001.

Recyclable.
