Website launch

The time is nearly upon us!

We have been working hard to make sure we created a new website that our customers would appreciate and we are ready to reveal the results. It has the same great content and information as

before but with a cleaner design, clearer navigation and online quote requests we believe it's even better than before.

Building Biology Association

We are proud to announce our involvement and support of the Building Biology Association (BBA), a non-profit organisation whose purpose is to promote the awareness, understanding, design, construction and use of healthy buildings. Technical Sales Advisor Andy Bannister is working towards qualifying as a Building Biologist Consultant and becoming an approved BBA point of contact. If you would like to know more about the BBA please contact us.

Building on Glass Foundations

The number of applications for our GEOCELL foamed glass continues to grow and it has now been awarded LABC approval for its use as a sustainable insulating foundation material. There are a number of approved approaches to its use as a foundation material, making it a viable option for all types of build. If you would like more information on GEOCELL visit our website or contact the UK Technical Sales Executive, Carl Sanger on 01409 251184 or sales@geocelluk.com.

It's Competition time again

We love to hear about your projects and for our latest competition we want to see your images of our materials at work. Just send us your before and after photos with details of the materials used and you will be entered into our prize draw. The winning entry gets 4 free rounds of Golf at our local Holsworthy Golf Course. There are also runner up prizes of a free place on one of our training courses of your choice, and our Practical use of Lime and Tadelakt DVD's.

Pavatex systems training

We like to make sure we are always keeping up to date with our product knowledge and members of our technical sales staff have just undertaken further CPD training with Pavatex on their sustainable woodfibre and render systems. If you are interested in the woodfibre insulation systems contact our office for helpful and friendly advice and guidance.
