

Protecting The Built Environment

UNIBLUE

UNIVERSAL DISINFECTANT FOR HARD AND WATER TOLERANT SURFACES

For the disinfection of hard surfaces in domestic, retail and commercial property, food and drinks industry and healthcare for non-invasive instruments (by filling or immersion) and areas where the surface may be in contact with patients or medical staff

Bactericidal

Effective against both gram+ and gram- bacteria including superbugs

Virucidal

Suitable for both envelope and non-envelope viruses including Noro, Adeno, Polio & Bovine. BPR Authorization Number: UK-218-1168. Fully tested to relevant EN standards for Pt's 2, 3 & 4 (see contact times)

APPLICATION

UNIBLUE is a revolution in hard surface cleansers and disinfectants. The product is based on natural organic acids, commonly found in the food industry and whilst it's non-toxic safe on the skin and for the environment, it has a rapid, powerful, broad spectrum kill action. And, because of the mode of action, target organisms cannot build-up resistance

CLEANING:

UNIBLUE has a highly effective cleaning action, comparable with most off-the-shelf, more hazardous disinfectants. For deep cleaning, apply UNIBLUE with a cloth or spray on the surface and leave for 2-3 minutes. Wipe the surface to remove any dirt. Repeat for heavily soiled areas. Once clean, apply UNIBLUE with a cloth and leave. For large surface areas, application can be by electrostatic spray or cold fogging.

DISINFECTION:

After cleaning, simply spray the surface or wipe with a cloth or tissue soaked in UNIBLUE and leave. No need to rinse afterwards. UNIBLUE can be used as a pre-wash, sprayed onto bedding and clothing prior to going to the laundry.

Contact time table (in minutes)	PT2		PT3	PT4	
EN Tests	Healthcare hard surfaces	Instruments by immersion or filling	Veterinary and farming hard surfaces	Food industry hard surfaces	Inner surfaces
Bacteria - gram positive and negative incl. superbugs 1656, 13727, 14561, 16615, 14349	1 minute	1 minute	30 minutes	5 minutes	5 minutes
Viruses - Noro, Adeno, Polio, Bovine etc. 14476, 14675	2 minutes	2 minutes	30 minutes	2 minutes	2 minutes
Yeast - Candida Albicans 1657, 13624, 13697, 14562, 16438	5 minutes	5 minutes	30 minutes	5 minutes	5 minutes
Mycobacteria incl. terrae, avium etc. 14348	10 minutes	10 minutes		10 minutes	10 minutes

This product is approved under the EU BPR Regulations for the universal disinfection of hard and water tolerant surfaces.

UK BPR Authorization Number: UK-218-1168

Approved for use under the following parts

Pt2 [Healthcare]

Pt3 [Veterinary & Farming]

Pt4 [Food Industry hard Surfaces]

In order to comply with the BPR authorization, surfaces must remain wet for the duration of the contact time listed in the table. Under certain conditions, drying surfaces may require further applications to comply with the contact time listed.

Store out of direct sunlight. Keep out of reach of children. For indoor use only. To avoid risks to man and the environment comply with the instructions for use. Wash hands and exposed skin before meals and after work. The Control of Substances Hazardous to Health (COSHH) Regulations 2002 (as amended) will apply to the use of this product at work.

Contains: Lactic Acid, Peppermint Oil, Tartaric Acid, Lavender Oil.

Dispose of in accordance with local or national regulations.

This container may be re-cycled in normal plastics recycling (HDPE).

Health & Safety

Refer to the Safety Data Sheet for full information on the safe use of this product.

This information is given in good faith and is based on the on the best of current knowledge from use and experience. However all recommendations are made without warranty or guarantee as conditions of use lie outside our control. Customers are advised that all technical information is under constant review and changes may occur without notice. Any person proposing to use this product should assess the suitability for application prior to commencing work.
